Radu-Andrei Nedelcu

Nationality: Romanian

(+40) 742983523

Date of birth: 28/02/2000

Gender: Male

Email address: radu.ndlcu@gmail.com

Website: https://github.com/NedelcuRadu

Address: Str. Tineretului Nr. 17, Bl.4, Sc. A, 040343 Bucharest (Romania)

ABOUT ME

Passionate software engineering student living by the Pareto principle, always wanting to build the most efficient solution with the lowest effort possible. Have developed several android apps, websites, eCommerce platforms, and APIs, including LogoTalkie, a speech therapy app with *over 6.000 active users and 40.000 downloads* on Google Play.

WORK EXPERIENCE

Junior Business Analyst

Tremend Software Consulting [07/2021 – 09/2021]

City: Bucharest
Country: Romania

- Gathering, validating, and documenting business requirements.
- Creating functional specifications for solutions.
- Conducting meetings and presentations to share the client's needs and proposed solutions.

Key Achievement: Acted as a full-fledged BA while my mentor was on vacation. After gathering several requirements from the client, I managed to analyze and present them to the development team, assess each one's implementation difficulty and decide their priority based on that.

EDUCATION AND TRAINING

Bachelor's in Computer Science

Faculty of Mathematics and Informatics - University of Bucharest [2019 – Current]

Address: Strada Academiei 14, București 010014, Bucharest (Romania)

Production Engineering Training

Adobe Systems Romania [2022 – Current]

https://github.com/Production-Engineering

As a team of 2, developed an API in Java using Spring for URL shortening and then applied best practices for SaaS products such as:

- Testing (Unit, Integration, Performance)
- Continuous Integration
- Monitoring

Salesforce Development Training
Deloitte Digital [2021 – 2022]

Final grade : 10
https://github.com/NedelcuRadu/NedelcuRadu/blob/main/Salesforce Theoretical Project.pdf https://github.com/NedelcuRadu/NedelcuRadu/blob/main/Practical Project - Iuga Paula Nedelcu Radu.pdf

- Salesforce Clouds
- Data Models
- Data Quality
- Record Types & Page Layouts
- Security Models
- Process Automation (Action Builder, Flow Builder)
- Custom Code Automations
- Integration
- Lighting Web Components
- Branded UI
- Reports & Dashboards
- Testing

Workshop Oracle SQL Tuning
Oracle [10/03/2021]

Workshop Git
Cariere v10 [24/02/2021]

LANGUAGE SKILLS

Mother tongue(s): **Romanian**

Other language(s):

English

LISTENING C2 **READING** C2 **WRITING** C2

SPOKEN PRODUCTION C2 **SPOKEN INTERACTION** C1

DIGITAL SKILLS

Programming Languages
Java / C# / C++ / Python / JavaScript / PL/SQL

Technologies
ASP.Net / Unity / WordPress / Basic Knowledge of Flask Python Framework / Linux / WooCommerce / GIT & Github / Java Boot Spring / Machine Learning

PROJECTS

LogoTalkie | Logopedul Digital - Speech Theraphy Android App

[2020 – Current]

Technologies Used: Unity, C#, Java

Personal Project

- Developed an Android App using Unity in order to help children with speech problems practice at home on their own.
- Uses voice recognition to provide instant feedback to the user about his pronunciation.
- Currently has over 6k active users and over 40k downloads.
- Incorporated native android speech recognition in Unity by creating a plugin.
- Has push notifications, in-app reviews, Play Game Services Achievements and in-app purchases.

https://play.google.com/store/apps/details?id=com.Talkie.R

LogoTalkie | Vorbește cu mine - AAC Android App

[2021 – Current]

Technologies Used: Unity, C#

Personal Project

- After confirming the market need and the lack of competition in the Romanian marketplace, I decided to develop an AAC app similar to Proloquo2Go that helps non-verbal people communicate.
- Currently, it is in the open testing phase, with more than 100 users already.

https://play.google.com/store/apps/details?id=com.LogoTalkie.PECS

CleverBee.ro - Online Course Platform

[2021 – Current]

Technologies Used: WordPress, WooCommerce, TutorLMS

Freelance Project

- Designed and created the platform.
- Supports course creation & enrollments.
- Integrated payment by card.
- Currently maintaining website up to date.

https://www.cleverbee.ro/

Blockchain Auction System

[03/2022]

Technologies Used: JavaScript, HTML, jQuery, Truffle, Ganache, MetaMask, Solidity, IPFS

People in team: 3

- Developed a DApp that lets users create auctions and bid on objects without the need of a central entity that keeps track of them
- Deployed Solidity contracts to store each auction on the blockchain and used the Clone Factory design pattern to optimize gas costs.
- Used IPFS in order to let users upload a representative photo for their auction.

https://github.com/BlockchainAuctionSystem/AuctionSystemDApp

SmartSleep - IoT program for a smart bed device

[12/2021 – 02/2022]

Technologies Used: Python, Flask, HTTP, MQTT

People in team: 5

- Led the team in order to build an API that can control a smart bed by receiving data from different sensors
- Split into multiple microservices (one for the sound sensor, one for the thermometer, etc) that communicate with each other via HTTP/MQTT
- Offers insight into the user's sleep patterns

https://github.com/SmartSleepIoT/SmartSleepCoding

Rogue World - Roguelike Unity Game

[11/2021 – 01/2022]

Technologies Used: Unity, C#, ML-Agents

People in team: 5

- Coordinated the team in order to build a roguelike game inspired by Skull and Rogue Legacy 2
- Has 4 different playable characters and 4 different levels.
- Uses serialization to save player progress
- The final boss is AI-powered, trained with ML-Agents.

https://github.com/RogueLike-Game-Dev/RogueLike-Game-coding

NoWorryParking - Android App

[03/2021 – 06/2021]

Technologies Used: Unity, C#, PHP, Google Places API, MapBox SDK, HTTP

People in team: 4

- An app that allows users to reserve & pay for their parking spot in advance
- Supports user accounts, in-app payments
- Created a PHP server-side for storing accounts, reservations & parking spots.
- Used Google Places API for testing purposes.

https://github.com/NoWorryParking/Coding

Java Auction System

[03/2021 – 05/2021]

Technologies Used: Java, Oracle

- Created a terminal-based auction system in Java.
- Supports CRUD operations for auctions, products, bids, users.
- Can import data from CSV files.
- Logs important information to file.

https://github.com/NedelcuRadu/PAO

Aroti.ro - Online Shop

[2021]

Technologies Used: WordPress, WooCommerce

Freelance Project

- Designed and created the platform.
- Added all the products

https://aroti-lenjerie.ro/

Mock Gym Database

[2021]

Technologies Used: SQL, PL/SQL, Oracle 11g

- Designed the database (entities and the relationships between them)
- Created different functions, procedures, and triggers to facilitate working with it
- Created a package that offers features for member management

https://github.com/NedelcuRadu/SGBD

ASP.NET Task Management App

[2021]

Technologies Used: C#, Entity Framework (code-first approach), Identity Framework, GitHub

People in team: 2

- Built a web app that lets users efficiently track their tasks and optimize their time
- Used MVC Design Pattern

https://github.com/NedelcuRadu/TaskManagement

ScienceOn Website

[2021]

Technologies Used: WordPress

Freelance Project

- Designed and created the website for the national science contest ScienceOn, the only contest fully organized by students during the pandemic and had over 5.000 participants.
- Maintained the site up to date, both content-wise and update-wise.

https://www.facebook.com/concursinterdisciplinar/

Numere Numere - Android App

[2021]

Technologies Used: Unity, C#, Java

- Developed an Android App using Unity in order to help children learn numbers.
- Uses voice recognition, text to speech, and implements the Google Billing Library.
- Over 100 active users, 500+ downloads.

https://play.google.com/store/apps/details?id=com.Talkie.NumereNumere
